

SEALEX[®] JOINT SEALANT

Shelf Life

The shelf life of SEALEX[®] Joint Sealant is indefinite and the product will not deteriorate over time.

The PSA tape has no impact on the properties of SEALEX[®]. It is merely there to hold the joint sealant in place until the flange is bolted together.

The ability of a gasket to make and maintain a seal depends not only on the style and quality of the gasket material, but also on medium being sealed, the flange design, the amount of pressure applied to the gasket by the bolts and how the gasket is assembled onto the flanges and tightened. These factors are beyond the manufacturer's control.
